*(Abstract should be one, single paragraph)*

Please replace the ABSTRACT OF THE DISCLOSURE on page 25 with the following ABSTRACT OF THE DISCLOSURE:

--In one aspect of the present invention, a camera is provided having a first electronic circuit board with first electronic circuit to perform a first set of camera functions. The first electronic circuit has a first set of electrical contacts. A second electronic circuit board is also provided. The second electronic circuit board has a second electronic circuit with a second set of electrical contacts to engage the first set of electrical contacts. The second electronic circuit is defined to cooperate with first electronic circuit to perform a second set of camera functions when the second set of electrical contacts engage the first set of electrical contacts. A frame holds the first electronic circuit board.

A cover joinable to the frame is provided. A mounting is also provided for holding the second electronic circuit board and positioning the second set of electrical contacts so that when the cover is joined to the frame the second set of electrical contacts are positioned to engage the first set of electrical contacts to cause the first electronic circuit board to cooperate with the second electronic circuit to perform the second set of camera functions. --

#### REMARKS

As a result of scrivener's error, this application, as filed, is identical to co-pending U.S. Pat. Appln. No. 10/033,482, entitled CAMERA ELECTRONIC SYSTEM AND METHOD OF ASSEMBLING SAME filed in the name of Douglas W. Constable on December 27, 2001.

The Preliminary Amendments made herein correct this scrivener's error by introducing claims for a RECYCLABLE CAMERA AND METHOD FOR ASSEMBLING SAME and by amending the Background, Summary of the Invention and Abstract accordingly. The preliminary amendments made herein to the specification have been made to ensure the consistency of the numbering and nomenclature used therein. No new matter has been introduced by way of these amendments.
